

Collage Your 2021 Vision

- Collage can be completed using ready-made images, letters, and words (found in magazines, advertisements, newspapers, etc.) or created by hand and then glued or taped together.
- This can also be done digitally by taking screen shots and making a digital album or copying + pasting images into a word or notepad document vision board.
- Think about your wishes for the year ahead, what they might look like, or what words come up for you.
- Assemble the images and/or words that fit your vision for 2021. Consider the arrangement of images/words, what is in the center, which elements are next to one another or far apart, and what themes might be repeating.
- There is no wrong way to do this!
